

*Julie helped care for my husband's uncle the last few years on his life during numerous hospitalizations. He had COPD and was frightened, demanding, and panicky during his stays. Julie would take time out to sit with him and give him reassurance to help him feel safe. Her calming and caring touch made a huge impact during these hospital stays. I have seen Julie take this time with all of her other patients needing extra TLC. She is an exceptional nurse, friend and co-worker - Lisa Johnson*
